

Melius & Hockenberry Environmental Services, Inc.

Project Summary

MHES completed work on various environmental aspects relating to upgrading a former Girl Scout Camp to a camp for disadvantaged youth.

As part of the upgrading of the facility, MHES provided wetland delineation for the 118 acre facility, coordination with permitting agencies, as well as permitting for minor impacts.

A ground water study and pre-drilling plan were prepared for the camp to upgrade potable water supplies for future camp needs.. The ground water project consisted of permitting, drilling, pump testing and reporting of the ground water project.

A Phase I environmental site assessment was also conducted for the camp property.

View of forested wetlands located on the property

The project was completed in 2008

PROJECT PROFILE: *Laurel Mountain Christian Camp Environmental Services*

Services Provided

- ◆ Wetland Delineation & Reporting on 118 acres
- ◆ Macroinvertebrate Surveys
- ◆ Encroachment Permitting
- ◆ Phase I Environmental Site Assessment
- ◆ Ground Water Development Project for two potable water wells

Flowing artesian well, producing 200+ gallons per minute.

Soil Evaluation in Upland Area.
